Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	10/797,617	RHOADS ET AL.	
	Examiner	Art Unit	
	ANDRAE S. ALLISON	2624	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on Amendment filed 01/15/2009.
 2a) This action is **FINAL**. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-6,8,10,11, and 15 - 23 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 1-6,8,10,11, and 15 - 23 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date. _____ .
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO/SB/08)	5) <input type="checkbox"/> Notice of Informal Patent Application
Paper No(s)/Mail Date _____.	6) <input type="checkbox"/> Other: _____ .

DETAILED ACTION

Response to Remarks

1. The Office Action has been made issued in response to amendment filed May 21, 2007. Claims 1-6, 8,10,11 and 15 -23 are pending.

Interference

2. Applicant has indicated that the claims in this application were copied from US PGPUB 2001/0055390 (see “Notice of Copied Claims” filed 09 March 2004). However Applicant has not submitted a claim Chart showing written description support in Applicant's specification as required by 37 CFR 41.202 (a)(5).

Priority

3. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. § 120 as follows: The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application); the disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. § 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The legal criteria for the “written description” requirement is laid out in M.P.E.P. § 2163, as well as the *Guidelines for Examiner of Patent Applications Under the 35*

U.S.C. § 112, first paragraph, “Written Description” Requirement, published in the Federal Register, Vol. 66, No. 4, January 5, 2001.

“[T]he test for sufficiency of support...is whether the disclosure of the application relied upon ‘reasonably conveys to the artisan that the inventor had possession at that time of the later claimed subject matter.’” *Ralston Purina Co. v. Far-Mar-Co., Inc.*, 772 F.2d 1570, 1575; 227 USPQ 177, 179 (Fed. Cir. 1985) (quoting *In re Kaslow*, 707 F.2d 1366, 1375; 217 USPQ 1089, 1096 (Fed. Cir. 1983)). “Although [the applicant] does not have to describe exactly the subject matter claimed,...the description must clearly allow persons of ordinary skill in the art to recognize that [he or she] invented what is claimed.” *Vas-Cath*, 19 USPQ2d at 1116 (quoting *Gostelli*, 872 F.2d 1008, 1012; 10 USPQ2d 1614, 1618 (Fed. Cir. 1989)). It is “not a question of whether one skilled in the art might be able to construct the patentee’s device from the teachings of the disclosure...Rather, it is a question whether the application necessarily discloses that particular device.” (*Jepson v. Coleman*, 314 F.2d 533, 536; 136 USPQ 647, 649-50 (CCPA 1963)). “The question is not whether a claimed invention is an obvious variant of that which is disclosed in the specification. Rather, [the] application itself must describe an invention, and do so in sufficient detail that one skilled in the art can clearly conclude that the inventor invented the claimed invention as of the filing date sought” *Lockwood v. American Airlines Inc.* 41 USPQ2d 1961 at 1966 (Fed. Cir. 1997).

The claims in the instant application variously include limitations that are not described in the priority application(s)¹, as originally filed, in sufficient detail that one skilled in the art can clearly conclude that applicant invented the application as of the filing date of the priority application(s). Specifically claim 1 requires a geometric transforming step of performing inverse transformation of said identified geometric transformation. However, the disclosure in the priority documents does not describe a geometric transforming step of performing inverse transformation of said identified geometric transformation. The specification does state that once the orientation parameters, i.e. geometric transformations, are found, a reader can reorient the target image before extracting, but there is no specific discussion as to how this re-orientation is done.

Furthermore, a number of the dependent claims include additional limitations that are likewise not adequately described by the disclosure. Specifically, claim 4 requires said frequency transforming step, Fourier transformation is performed, and conversion into amplitude spectra of said frequency components is made. The specification does disclose a Fourier transformation is performed, however, does not describe wherein conversion into amplitude spectra of said frequency components is made. Similarly while the disclosure does discuss a block dividing step of dividing said image data into at least one blocks, there is not discussion of block synthesizing step of combining blocks divided by said block dividing step to reconstruct the image as

¹ i.e., Application S.N. 08/512,993 filed 09 August 1995, which applicant has pointed to as providing support for the invention now claimed. The specification of the '993 application, as well as the intervening applications is substantially identical to the specification of the instant application. However, the subject matter of the instant

required by claim 6. Because none of these additional limitations is described in the specification, the disclosure, as originally filed in the priority application(s), fails to adequately show that applicant possessed the invention now claimed at the time the various priority documents were filed.

While a number of the claimed limitations might have been obvious to one of ordinary skill in the art, this is not sufficient to demonstrate possession of the claimed invention because these limitations are not *necessarily* required by the disclosure in the priority application(s). “One shows that one is ‘in possession’ of *the invention* by describing *the invention*, with all its claimed limitations, not that which makes it obvious.”

Lockwood v. American Airlines Inc. 41 USPQ2d 1961 at 1966 (Fed. Cir. 1997) (emphasis in original). Although the invention is not required to be described using the exact same terms, “the specification must contain an equivalent description of the claimed subject matter. A description which renders obvious the invention for which an earlier filing date is sought is not sufficient.” *Lockwood v. American Airlines Inc.* 41 USPQ2d 1961 at 1966 (Fed. Cir. 1997). “It is not sufficient for purposes of the written description requirement of Section 112 that the disclosure, when combined with the knowledge in the art, would lead one to speculate as to modifications that the inventor might have envisioned, but failed to disclose. Each application in the chain must describe the claimed features.” *Lockwood v. American Airlines Inc.* 41 USPQ2d 1961 at 1966 (Fed. Cir. 1997). Since the priority application(s) do not describe or necessarily require the various claim limitations addressed in more detail above, the priority

application(s) do not adequately describe the invention, as now claimed, so that one of ordinary skill in the art would recognize that applicant was in possession of the claimed invention as of the filing date(s) of these priority application(s). Therefore, the claimed invention is only entitled to the filing date of the instant application, where these claims were first presented (i.e., 09 March 2004).

Claim Rejections - 35 U.S.C. § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-6, 8 and 10-11 are rejected under 35 U.S.C. § 102(e) as being clearly anticipated by Hayashi et al. '758 (US 6,741,758 B1).

As pointed out more fully above, applicant has not complied with the conditions for receiving the benefit of the claimed priority filing date(s) because the disclosure is not sufficient to comply with the requirements of 35 U.S.C. § 112, first paragraph. Therefore, the effective filing date for the invention defined by claims 1-6, 8 and 10-11 is 09 March 2004, and Hayashi et al. '758 qualifies as prior art under 35 U.S.C. § 102(e). Furthermore, because claims 1-6, 8 and 10-11 of the instant application were

specifically identified by applicant as corresponding identically to claims 1-6, 8 and 10-11 of Hayashi et al. '758 the instant claims are clearly anticipated by Hayashi et al. '758.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 15 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,424,725. The conflicting claims are not identical because patent claim 15 requires the additional step of "detecting an embedded signal in the frequency component", which is inherent feature in claim 1. However, the conflicting claims are not patentably distinct from each other because:

- Claims 1 and 15 recite common subject matter;
- Whereby claim 1, which recites the open ended transitional phrase "comprising", does not preclude the additional elements recited by claim 15, and

- Whereby the elements of claim 1 are fully anticipated by patent claim 15, and anticipation is “the ultimate or epitome of obviousness” (*In re Kalm*, 154 USPQ 10 (CCPA 1967), also *In re Dailey*, 178 USPQ 293 (CCPA 1973) and *In re Pearson*, 181 USPQ 641 (CCPA 1974)).

Claim 1 of Instant Application	Claim 1 of Patent Application 10/558868
<p>A signal processing method for determining a geometric transformation applied to a media signal, the method comprising:</p> <p>transforming the media signal into a frequency domain to produce frequency components of the media signal;</p> <p>detecting an embedded signal in the frequency components; based on the detecting, determining geometric transformation parameters defining a geometric transformation of the media signal; and using the geometric</p>	<p>1. A method of determining a transformation of a media signal having an embedded code signal, the method comprising:</p> <p>performing a logarithmic sampling of the media signal to create a sampled signal in which scaling of the media signal is converted to translation in the sampled signal; and</p> <p>computing translation of the embedded code signal in the sampled signal to determine scaling of the media signal subsequent to the encoding of the embedded signal in the media signal..:</p>

transformation parameters to transform
the media signal.

Inquires

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANDRAE S. ALLISON whose telephone number is (571)270-1052. The examiner can normally be reached on Monday-Friday, 8:00 am - 5:00 pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vikkram Bali can be reached on (571) 272-7415. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
